

UV SAFE DRUMS

GENERAL INFORMATION

- All black containers provide complete protection against UV rays from 200 to 400 nm.
- Food grade approved.
- Watertight.
- Sealable with Compact seal (7800).
- Maximum content temperature of 80 °C.
- The content must be cooled to 30 °C before the drums are sealed and stacked.

• Some products used in the chemical and pharmaceutical industries such as fertilizers, polymers, photochemicals and nutrients can suffer when left in sunlight. This damage can occur in several ways: changes in color, odour, taste or loss of mechanical properties.

• The natural polyethylene drums are not safe from UV rays. This implies that products packaged in standard drums are not completely protected from UV rays unless precautions are taken.

TECHNICAL SPECIFICATIONS

Reference	7006	7015	7026	6942
Capacity (L)	6	15	26	55
Container diameter (mm)	198	274	316	410
Opening diameter (mm)	136	204	204	354
Height (mm)	265	328	426	495
Material	HDPE	HDPE	HDPE	HDPE
Container colour	Black	Black	Black	Black
Cap colour	Black	Black	Black	Black
Available with handles	No	No	No	Yes
UN approved	Solids and viscous materials	Solids and viscous materials	Solids and viscous materials	Solids and viscous materials
Container group	I, II, III	I, II, III	I, II, III	I, II, III
Maximum weight (kg)	20	22	33	69
